Assignment # 9

Consider a set of four data points: $f(0) = 3$, $f(4) = -2$, $f(-1) = 2$, $f(1) = 1$. In the following, these data points are to be used to find the best fit polynomial of degree 2 by using Least-Squares method and also by QR-decomposition method.

Problem # 1: Find the best fit polynomial, $p_2(x)$ of the above data points by least-squares method by answering the following:

1. [1 marks] Write down the matrices: A and b from the given data above.
2. [1 marks] Compute the normal matrix $A^T A$ and $A^T b$.
3. [2 marks] Use the results in the previous part to compute the column matrix $x = (a_0 \ a_1 \ a_2)^T$, where a_0 , a_1 and a_2 are the coefficients of the polynomials p_2 , and then write the expression of the polynomial p_2 .

Problem # 2: We now find the solution by QR-decomposition method using the same four data points given at the top by answering the following:

1. [1.5 marks] Identify the matrix A and b (Just copy from the previous problem). Now identify the linearly independent column vectors u_1 , u_2 and u_3 from the matrix A .

2. [2.5 marks] Using Gram-Schmidt process construct the orthonormal column matrices (or vectors) q_1 , q_2 and q_3 from the linearly independent column vectors obtained in the previous part, and then write down the Q matrix.
3. [1 marks] Now calculate the matrix elements of R , and write down the matrix R .
4. [0.5 mark] Compute Rx and $Q^T b$, where $x = (a_0 \ a_1 \ a_2)$ which are the coefficients of the polynomial p_2 .
5. [0.5 mark] Using the above result, find the values of $(a_0, a_1 \text{ and } a_2)$, and write the polynomial p_2 .

Submission of the Assignment # 9:

- Solve all the problems above.
- Prepare a title page including Your Name, Your ID#, Theory Section #.
- Prepare a single .pdf or .jpg file containing the tile page and the solution pages.
- To submit your assignment solution, visit the [Submission Link \(Click here\)](#). This will take you to a [Google Form link](#).
- Fill up the Google Form link with correct information and upload the file there. You are done.
